Summary

A highly motivated Diploma Mechanical Engineer with knowledge of Mechanical Design, 3D CAD Modeling, 2D Drafting, Assembly Design, and Engineering Drawings. Proficient in SOLIDWORKS, CATIA V5, and AutoCAD with hands-on experience in Part Design, Assembly, Sheet Metal Design, Weldments, Surface Modeling, GD&T, and Drafting. Familiar with manufacturing processes, engineering standards, and design principles. Eager to begin a career as a Mechanical Design Engineer where I can apply my technical skills, continuously learn new technologies, and contribute to innovative product development.

Professional Experience

Diploma engineering trainee(DET), Hind rectifier nashik	01/2025 – 06/2026
- Assisted in manufacturing, assembly, and maintenance activities. - Read and interpreted engineering drawings. - Followed quality control and safety procedures. - Worked with production and maintenance teams. - Gained hands-on experience in industrial manufacturing processes.	Nashik
CAD Design Intern, Infinite Graphix Technology	02/2026
	pune

Education

Government Polytechnic Jalgaon Diploma in Mechanical	03/2023
Cumulative GPA : 7.2	Jalgaon
Swami Vivekanand Junior College Higher Secondary school	05/2021
Percentage : 85.69%	Jalgaon

Skills

AutoCAD: 2D drafting, creating technical drawings	solidworks: Part designing, 3D modelling, creating assemblies, drafting
Catia: Part designing, 3D modelling, creating assemblies, drafting, surfacing	MS office: Excel ,words

Projects

Project 1: Boiler Furnace Structure Design, Software: SOLIDWORKS
Description: - Designed the structural frame of an industrial boiler furnace using SOLIDWORKS. - Created 3D models of structural members and fabricated components. - Developed complete assemblies and detailed manufacturing drawings. - Applied weldment features, engineering dimensions, and assembly constraints.
